

85 Free and Low-cost Image Sources

It's essential to be sure you are legally allowed to use an image (using ones found through a Google images search is not OK).

Included here are more than 80 resources for free or low-cost photos, vector images and icons. Some photos may require attribution to the site and/or photographer depending on how you plan to use them. Some may be limited to how often or where they are used. Always check the image's license, which is usually on its own page of the stock photo website and/or with the individual image.

Hyperlinked resources are in purple.
